Online Sales Dashboard User Manual.

Online Sales Dashboard is a web based portal where user can view real time sales data for a single day. The data regularly refreshed on an interval of one hour for pan India level.

Authentication and Authorization

This application has 4 types of users as follows.

1) Admin (Can view entire data and do administrative jobs for portal)
2) National Level (Can view pan India sales data)
3) Region Level (Can view sales data for that region assigned to the user)
4) Store Level (Can view sales data for that store assigned to the user)

Login Credential and Login session

Login can only be done through registered mobile number as user id and OTP (one time password) as password. OTP will be generated every time and will be sent to mobile number with each login.

User can not access the portal from more than one point with a single mobile number. If user logs in with a mobile number which is already used and active from some different point, the last session will be expired and user will be forcibly logged out from last point and new session will be starts from new point.
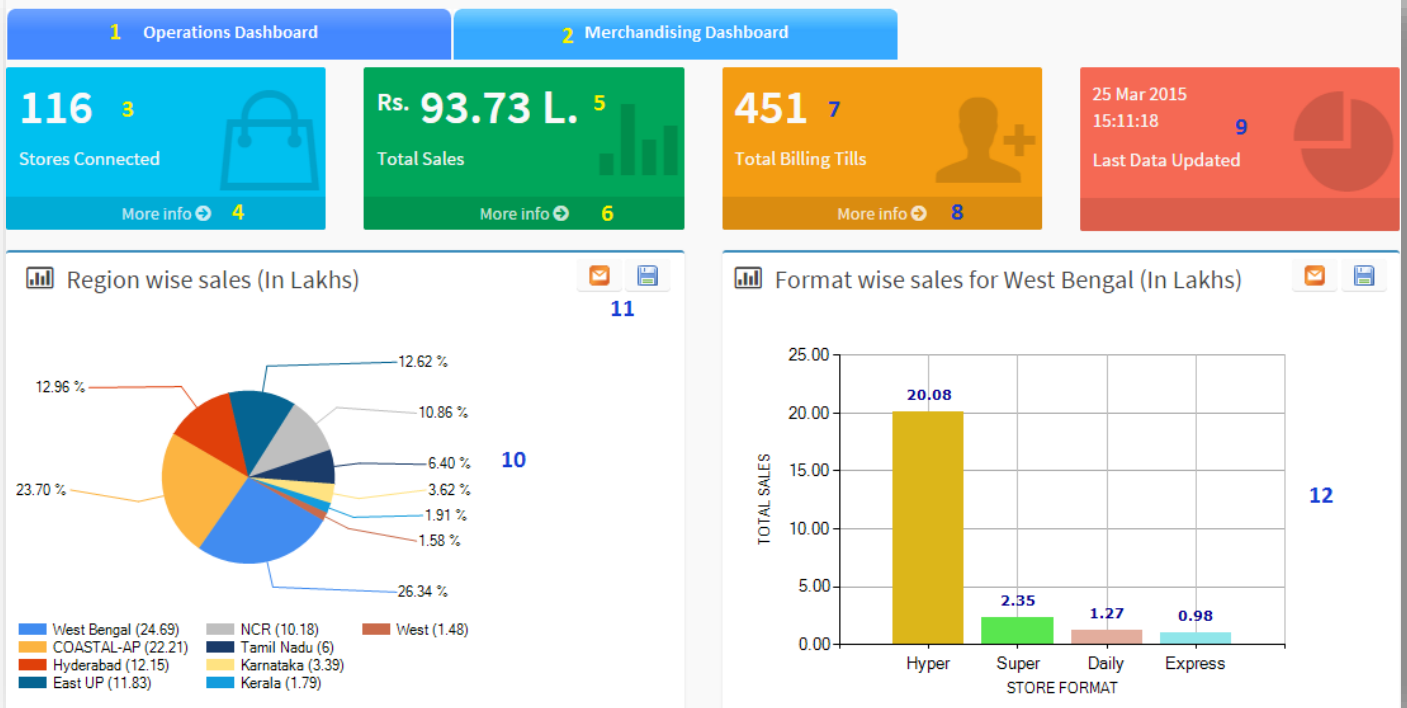

Portal Access Start time

This portal can be accessed from 9:00 AM till 11:59 PM every day.

Restriction on Data Availability

Sales data availability is fully dependent on network connectivity.

Please follow the access point in the image below and the description.

Authentication Level: ADMIN, National, Region and Store

3) **Total Number of stores connected**

This number represents the total number of stores from where sales data successfully posted to this portal. This is fully dependent on the network availability in the store and network availability with central server.

4) **More Info under Total number of stores connected.**

Clicking on the "More info" user can view the details of stores which are connected to this portal.

5) **Total Sales**

This figure depends on the authentication level user logged in.

A) If the user logged in as National level, then this is current sales value for pan India.

B) If the user logged in as Region level then this is current sales value for the region user assigned to.

C) If the user logged in as Store level then this is current sales value for the Store user assigned to.

6) **More Info under Total Sales**

Clicking on the "More Info" user can view Item wise sales data according to their authentication level.

a) If the user logged in as National level, then pan India sales data will be displayed.

b) If the user logged in as Region level then item wise sales data for the region user assigned will be displayed.

c) If the user logged in as Store Level then item wise sales data for the Store user assigned will be displayed

7) **Total number of Billing Tills**

This is the number of tills currently billing starts for the day.

8) **More Info under Total number of Billing Tills**

This gives a Store wise comparison between number of billing tills and the number of tills where "Day begin" done for the day.

Tills Day Begin done VS. Tills Billing Done   ✉ 📗

9) **Last Update Time**

This is the time when last data updated in this application. This is now configured for an interval of one hour.

10) **Pie Chart for Sales data**

This chart depends on the authentication level.

If user logged in as national level, region wise sales data will be displayed.

If the user logged in as Region level, then store format wise data will be displayed.

If the user logged in as Store level, then top ten till will be displayed.

Category wise sales

Here user can view Segment, Family, Class and brick level sales data according to the authentication level of the user.
